

# KESTREL INTERIORS LTD.

## ENVIRONMENTAL POLICY

Kestrel Interiors Ltd acknowledges the construction industry has a huge impact on the global and local environment and therefore strives towards sustainable and environmentally aware construction.

The company employs sustainable development in our policies and programmes from training and awareness of employees to more specific actions such as energy conservation, renewable energy generation, reducing pollution from travel, raising environmental concerns and dealing with them and greater re-use and recycling of waste.

We are committed to the maintenance of an environment management system to reduce our environmental impact. Kestrel Interiors Ltd has put the following measures into place to ensure its Environmental Policy Statement is achieved.

### **Environmental**

- Carry out and maintain an environmental management system.
- Carry out a regular evaluation of the Kestrel environmental performance on contracts, with performance reviews after projects completed.
- Consistently look at and update Kestrel's Environmental policy statement.
- Educate and motivate staff to conduct their actions in an environmental responsible manner by incorporating a deep learning approach to Kestrel's employee training.
- Company review system in place for every employee to suggest ideas to improve actions.
- Kestrel Interiors Ltd carries out risk management policies to reduce accidents with potential environmental impact.
- Constant Liaisons with Environmental agencies and other agencies interested in protecting the environment
- Kestrel maintains plant and equipment to a high standard to ensure minimal risk to environment.

### **Waste**

- Work towards minimising waste and maximising the re-use and recycling of materials.
- Implement actions to reduce waste and increase recycling within Kestrel operations from the very beginning of the contract.
- Implement actions to achieve reduction in water usage within Kestrel managed contracts.
- Keep up to date with waste management protocol as set out by WRAP information data on [www.wrap.org.uk](http://www.wrap.org.uk).
- Liaise with waste Contractors to ensure the correct procedures are followed.
- Set up Segregation of waste and mark waste disposal skips accordingly.

- Ensure hazardous waste is disposed of appropriately.
- Minimize noise and dust.
- Limit the usage of raw materials where appropriate.

### **Purchasing**

- Minimise the environmental impact of all Kestrel purchases of goods by working in partnership with suppliers and contractors in their packaging and delivery.
- Only use suppliers that employ an environmental policy and adopt an environmentally aware attitude in their day to day practises.

### **Sustainable Development**

- Conduct an environmental impact assessment of significant new policies.
  - Influence partners and external contractors to work towards sustainable development.
  - Raise the environmental awareness of the Kestrel personnel through training.
  - Only use recognised waste management companies who have a recycling attitude.
  - Keeping Kestrel constantly aware and compliant with all current and future legislation on site and in everyday work practises.
  - Kestrel Interior Ltd liaises with Clients and Sub contractors to ensure policies of Clients are achieved and Sub-contractors awareness is maintained.
-
